

Index of Experts

The Science of Early Child Development, 2nd Edition

Expert	Topic	Module and Page
Ron Barr	<i>Crying</i>	Coping and Competence Page 2.1.
	<i>Biological connections between mother and infant</i>	Coping and Competence Page 2.1.
	<i>Infant memory</i>	Communicating and Learning Page 2.3.
Marc Battle	<i>Emergent curriculum</i>	Communicating and Learning Page 3.4.
Jane Bertrand	<i>Vulnerability and risk</i>	<i>Developmental Health</i>
	<i>Neighbourhood as a context for development</i>	<i>The Ecology of Childhood</i> Page 1.1.C.
	<i>Nurturing relationships</i>	<i>Coping and Competence</i>
	<i>Optimal environments for children</i>	<i>Communicating and Learning</i>
Thomas Boyce	<i>Nature and Nurture - Symphonic Causation</i>	Brain Development Page 1.3.B. (Further Study)
Urie Bronfenbrenner	<i>Ecological systems theory</i>	The Ecology of Childhood Page 1.1.
Robbie Case	<i>Mathematical understanding</i>	Communicating and Learning Page 2.4.
Carl Corter	<i>Toronto First Duty project</i>	The Ecology of Childhood Page 2.2.
	<i>Supporting parents</i>	The Ecology of Childhood Page 3.2.
Joan Durrant	<i>Physical punishment of children</i>	The Ecology of Childhood Page 2.1.B.
	<i>Child temperament</i>	Coping and Competence Page 2.2.
	<i>Punishment and aggression</i>	Coping and Competence Page 2.4.
Joan Durrant, cont'd.	<i>Supporting the development of autonomy</i>	Coping and Competence

Expert	Topic	Module and Page
		Page 3.2.
	<i>Supporting the development of social skills</i>	Coping and Competence
		Page 3.3.
	<i>Children's relationships with caregivers and parents</i>	Coping and Competence
		Page 3.5.
Stanely Greenspan and Stuart Shanker	<i>Stages of brain development</i>	Brain Development
		Page 3.1.
Megan Gunnar	<i>Buffering stress responses – examples of research with animals and children</i>	Brain Development
		Page 2.3.
	<i>Children's stress levels</i>	Coping and Competence
		Page 2.3.
Betty Hart and Todd Risley	<i>Language development and children's experiences</i>	Communication and Learning
		Page 2.2.
Clyde Hertzman	<i>Developmental health and population health</i>	Developmental Health
		Page 1
	<i>British Birth Cohort Study</i>	Developmental Health
		Page 2.1.
	<i>Community mapping</i>	Developmental Health
		Page 2.2.E.
	<i>Biological embedding</i>	Brain Development
		Page 1.3. (Further Study)
	<i>Supporting families - Program barriers</i>	The Ecology of Childhood
		Page 3.2.
	<i>Supporting the development of social skills</i>	Coping and Competence
		Page 3.3.
Magdalena Janus	<i>Early Development Instrument</i>	Developmental Health
		Page 2.2.D.
Dan Keating	<i>The developmental health perspective</i>	Developmental Health
		Page 1
	<i>Understanding gradients</i>	Developmental Health
		Page 2.1.
	<i>The foundation of early brain development</i>	Brain Development
		Page 1.3. B.
	<i>How ECE's can support the development of self-regulation</i>	Coping and Competence
		Page 3.
	<i>Literacy and numeracy</i>	Communicating and Learning
		Page 2.4. (Further Study)
Dan Keating and Fiona Miller	<i>Self-regulation</i>	Coping and Competence
		Page 2.

Expert	Topic	Module and Page
Bryan Kolb	<i>Brain plasticity and sensitive periods</i>	Brain Development
		Page 1.2.
Michael Meaney	<i>Maternal care effects – examples of animal research</i>	Brain Development
		Page 2.1.
Alan Mirabelli	<i>Understanding families</i>	The Ecology of Childhood
		Page 1.1.A.
	<i>Neighbourhood as a context for development</i>	The Ecology of Childhood
		Page 1.1.C.
	<i>Supporting families</i>	The Ecology of Childhood
		Page 3.2.
Fraser Mustard	<i>Investing in the early years</i>	Developmental Health
		Page 3. and
		Page 3.1.
	<i>Understanding early brain development</i>	Brain Development
		Page 1.
<i>Biological embedding</i>	Brain Development	
	Page 1.3. (Further Study)	
<i>Epigenetics</i>	Brain Development	
	Page 1.3. A.	
<i>Sensing pathways</i>	Brain Development	
	Page 3.	
Charles Nelson	<i>Stages of prenatal brain development</i>	Brain Development
		Page 1.1. (Further Study)
	<i>Brain plasticity</i>	Brain Development
		Page 1.2. (Further Study)
	<i>Biological embedding</i>	Brain Development
		Page 1.3. (Further Study)
	<i>Genetic expression</i>	Brain Development
		Page 1.3. A.
	<i>Neuroscience research tools</i>	Brain Development
	Page 2.	
<i>Memory and face/object recognition</i>	Brain Development	
	Page 2.4.	
<i>Genetic and environmental influences on development</i>	The Ecology of Childhood	
	Page 1.	
<i>Bucharest Early Intervention Project</i>	The Ecology of Childhood	
	Page 2.3.A.	
<i>Memory, face recognition and implications for autism</i>	Communicating and Learning	
	Page 2.3.	

Expert	Topic	Module and Page
Charles Nelson, cont'd.	<i>Learning difficulties and face recognition</i>	Communicating and Learning
		Page 2.3. (Further Study)
Janette Pelletier	<i>Literacy programs</i>	Communicating and Learning
		Page 2.2.B.
	<i>Supporting emerging literacy</i>	Communicating and Learning
Michael Rutter	<i>Biological and experiential influences on development</i>	Brain Development
		Page 1.2.
	<i>Biological embedding</i>	Brain Development
		Page 1.3. (Further Study)
	<i>Genetic expression</i>	Brain Development
	Page 1.3. A.	
	<i>Genetic and environmental influences on development</i>	The Ecology of Childhood
		Page 1.
	<i>Nurturing relationships</i>	Coping and Competence
		Page 3.5.
Rob Santos	<i>Early brain development and experience-based learning</i>	Brain Development
		Page 1.3.
	<i>Early nurturing on brain development</i>	Brain Development
		Page 3.
Stuart Shanker	<i>Early brain development</i>	Brain Development
		Page 1.1.
	<i>Autism and brain development research</i>	Brain Development
		Page 2.2.
	<i>Autism and brain development research</i>	Coping and Competence
		Page 1.2.
Fiona Stanley	<i>The developmental health perspective</i>	Developmental Health
		Page 1
	<i>Population data</i>	Developmental Health
		Page 2.2
	<i>Universal and targeted programs</i>	Developmental Health
	Page 3.3	
	<i>The importance of early nurturing</i>	Brain Development
		Page 1.
	<i>Socio-political examples from Australia</i>	The Ecology of Childhood
		Page 2.4.
Stephen Suomi	<i>Maternal care effects – examples of animal research</i>	Brain Development
		Page 2.1.

Expert	Topic	Module and Page
Stephen Suomi, cont'd.	<i>Infant temperament</i>	Coping and Competence Page 2.2.
	<i>Gender differences</i>	Coping and Competence Page 3.4.
Richard Tremblay	<i>Development of aggression</i>	Coping and Competence Page 2.4.
	<i>Gender differences and the regulation of aggression</i>	Coping and Competence Page 3.4.
Mildred Warner	<i>The economic rationale for early years investments</i>	Developmental Health Page 3.1
	<i>Social capital</i>	Developmental Health Page 3.2
	<i>Universal and targeted programs</i>	Developmental Health Page 3.3
	<i>Investing in early years – social and political</i>	The Ecology of Childhood Page 2.4.
Janet Werker	<i>Language development and motherese</i>	Communicating and Learning Page 1.1.
	<i>Conducting research on early language development</i>	Communicating and Learning Page 2.1.
	<i>Critical periods in early language development</i>	Communicating and Learning Page 2.1.
